

Guidelines For Clients Receiving Medications

Please remember to:

- Keep all scheduled appointments.
- Call your treatment team to reschedule as soon as you know that you cannot keep an appointment.
- Tell your doctor/psychiatrist if you are taking your medications differently from how they are prescribed.
- Talk with your doctor/psychiatrist about possible side effects and interactions with other medications.
- Allow at least 48 hours notice to refill a prescription. Plan ahead before you run out of medication.
- Call by Thursday to ask for a refill if you will be running out of medication over the weekend.
